Manifesto

Things To Do

SYP will promote the need for high quality cultural, leisure and sporting activities for young people.

SYP will raise the profile of young people in a positive way by celebrating their achievements in an annual showcase or festival.

Safety

SYP will support young people to feel safe in their communities and involve them in tackling crime and anti-social behaviour.

SYP will promote good relationships between young people and the police.

Community

SYP will tackle the need for affordable housing in Slough.

SYP will campaign for improved access to public transport for young people up to 18.

Education & Employment Opportunities

SYP will campaign for quality PHSE lessons to enable young people to make informed life choices.

SYP will encourage partnerships with local businesses which lead to meaningful work experience, apprenticeships and training.

Health Services

SYP will raise awareness of support services for young people with additional needs.

SYP will campaign to reduce the stigma around young people's mental health needs.

Greater say

SYP will seek the views of young people and ensure that their needs are addressed.

SYP will actively seek the views of young people who are currently under represented.

Getting it right for children

SLOUGH
FOR YOUTH

Recommendations

Slough
Children and Young People's
Partnership Board
Getting it right for children

- **Need for Counselling in Slough**
- **Improved training in mental health for professionals working with young people**
- **Introduction of Mental Health Champions in schools**
- **Improved understanding and awareness of LGBT issues**

65% of LGBT young people have experienced homophobic bullying at school

44% of young LGBT people (16-24 year old) have considered suicide, in 41% of cases it's been a direct result of bullying

Making the health and wellbeing system work for Slough

Prof Terry Young

The Cumberland Initiative

The Five Year Forward View

- Needs to close critical gaps (p7)

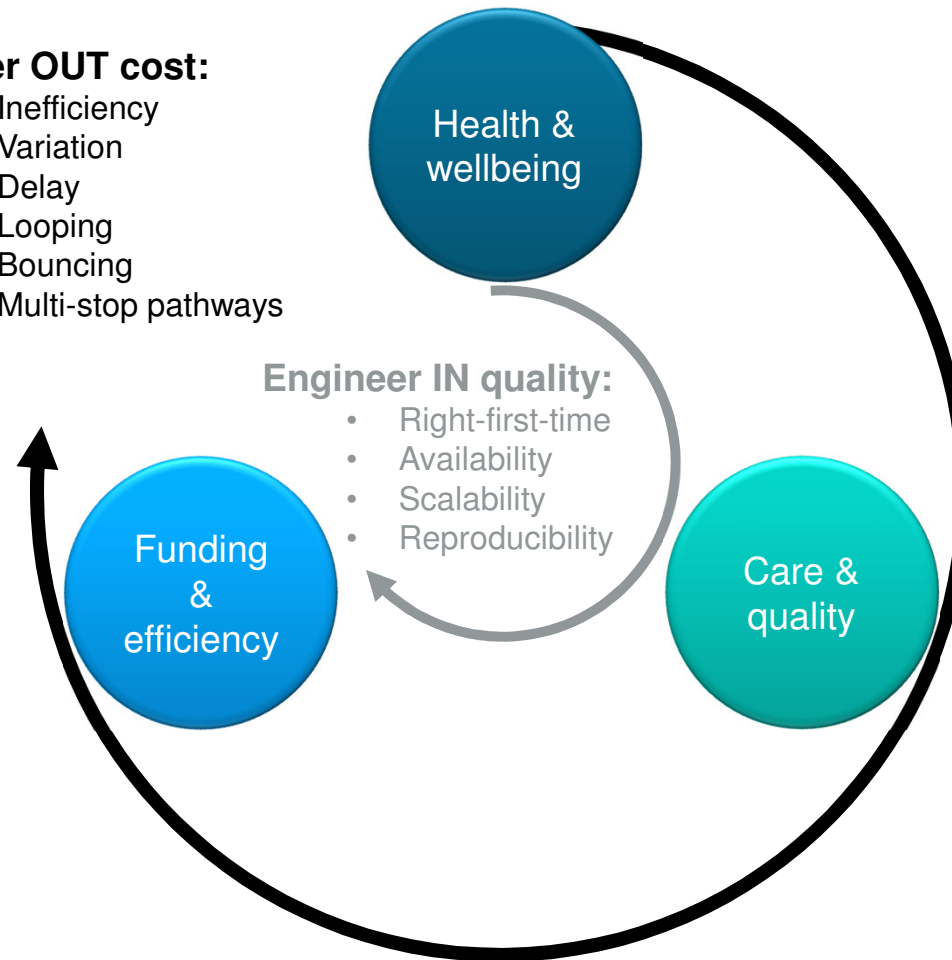

The Five Year Forward View: 3 gaps (p7)

Engineer OUT cost:

- Inefficiency
- Variation
- Delay
- Looping
- Bouncing
- Multi-stop pathways

Engineer IN quality:

- Right-first-time
- Availability
- Scalability
- Reproducibility

The Five Year Forward View

- Needs to close critical gaps (p7)
- Needs to connect health and wealth in a new way [p 11]

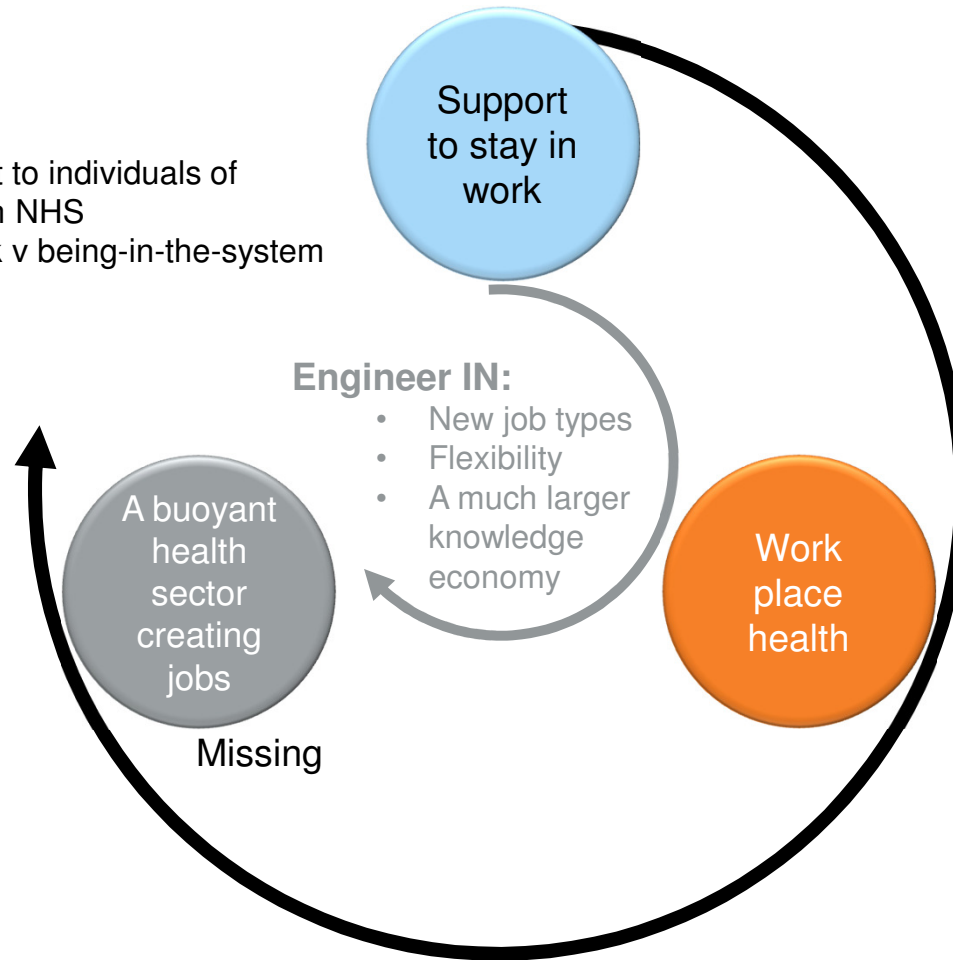

Health and Employment (p 11)

Engineer OUT:

- Crippling cost to individuals of engaging with NHS
- Being-in work v being-in-the-system

Engineer IN:

- New job types
- Flexibility
- A much larger knowledge economy

The Five Year Forward View

- Needs to close critical gaps (p7)
- Needs to connect health and wealth in a new way [p 11]
- Needs to be able to design and deploy new models of care with confidence [Chapter 3]

What is a model?

Lots of options:

- A shared mental construct
- Something small and physical
- Something large enough to walk through
- Something mathematical
- A computer representation

Page 18

Physical, maths-based & computer models can PROVE out services.

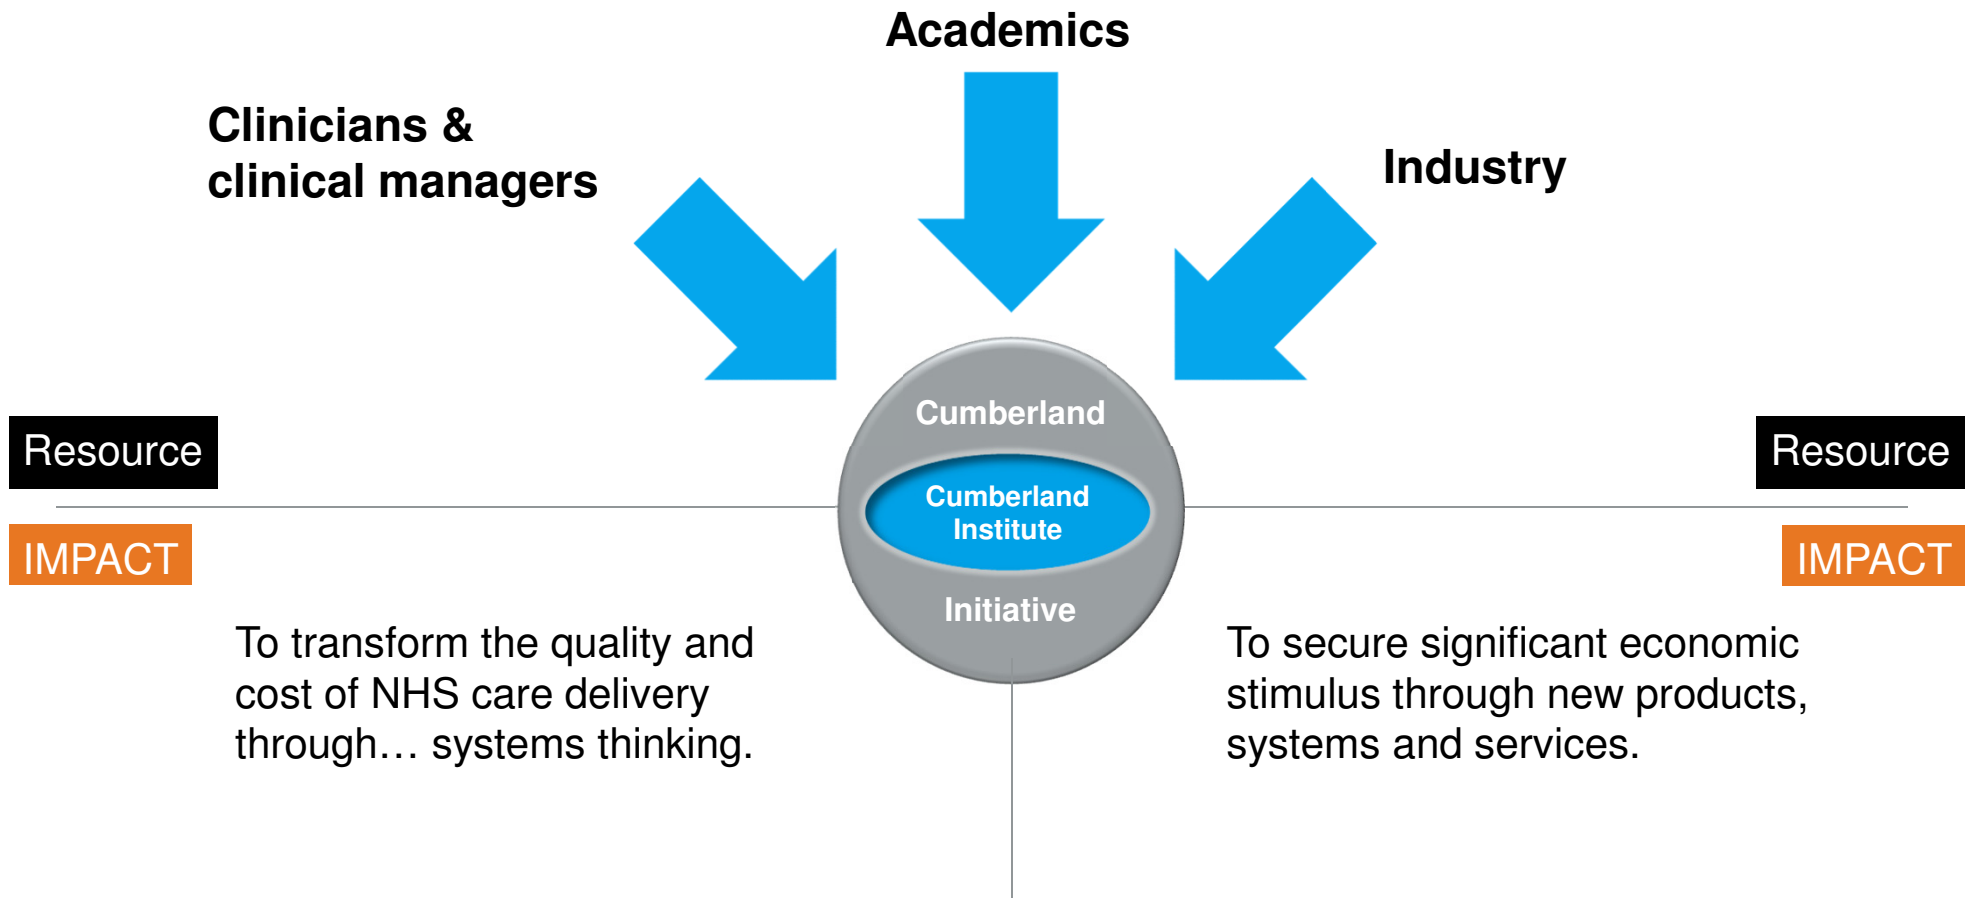

They are simpler versions of reality that TEST the critical performance & unintended consequences.

Final Year Project model of Mt Vernon Cancer Centre with proximity sensors to explore staff and patient flows. Laxman Kerai at Brunel 2014/15. Supervisors D Bell & T Young

What is our vision?

Page 19

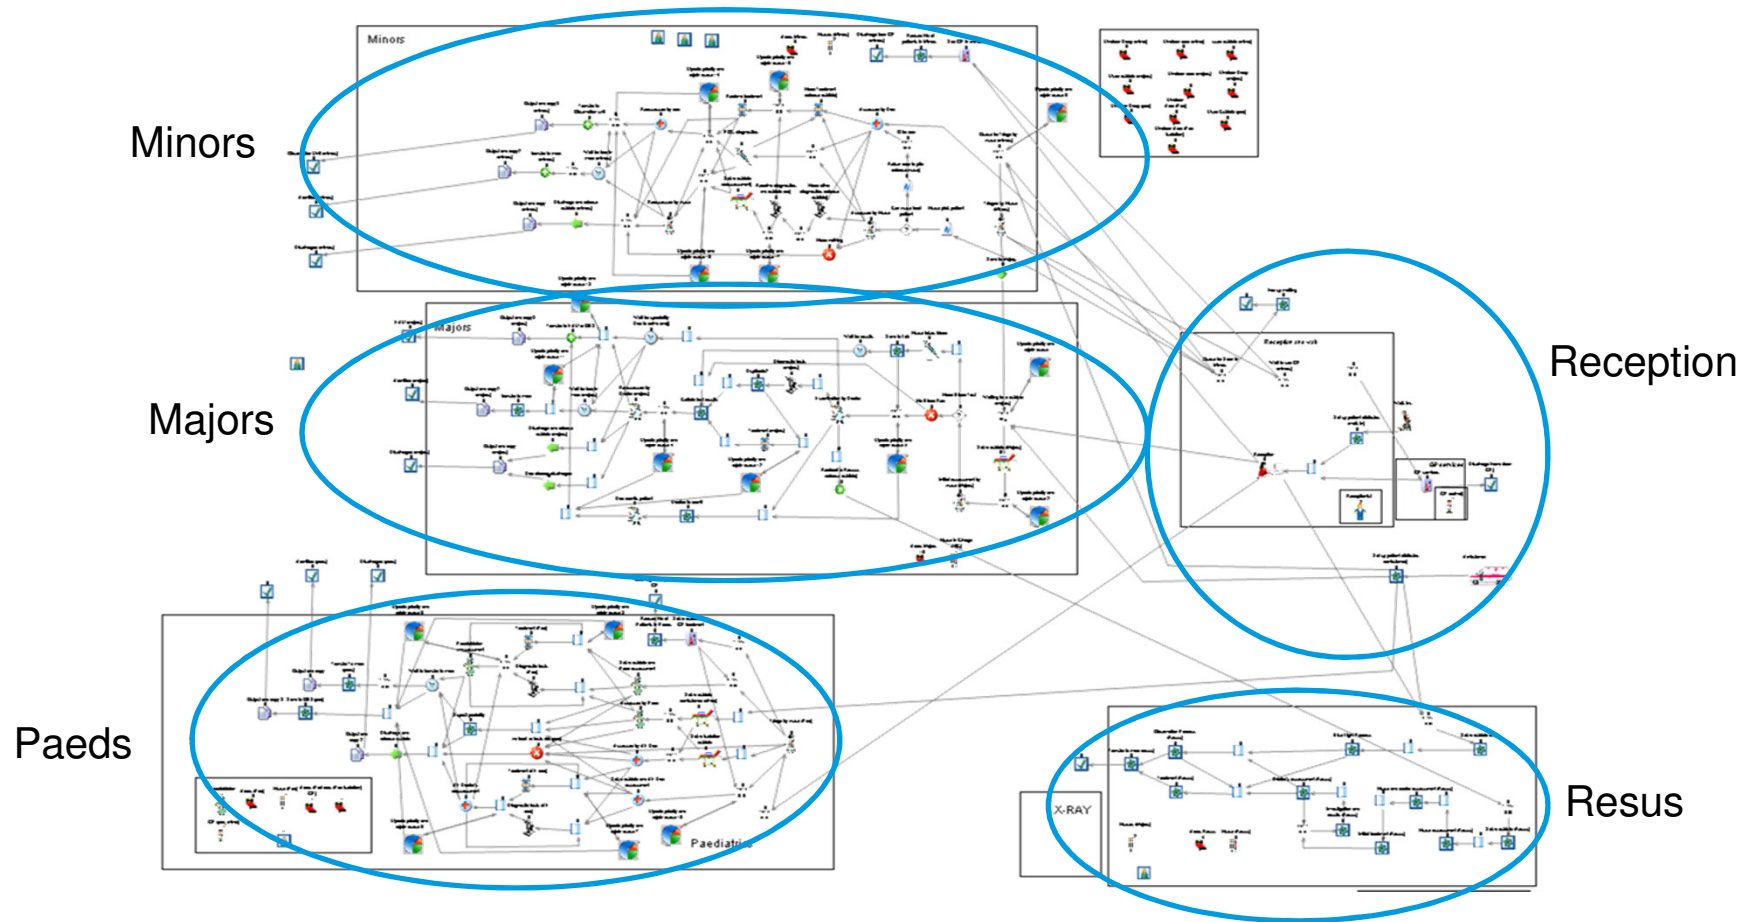

Example – an Emergency Dept.

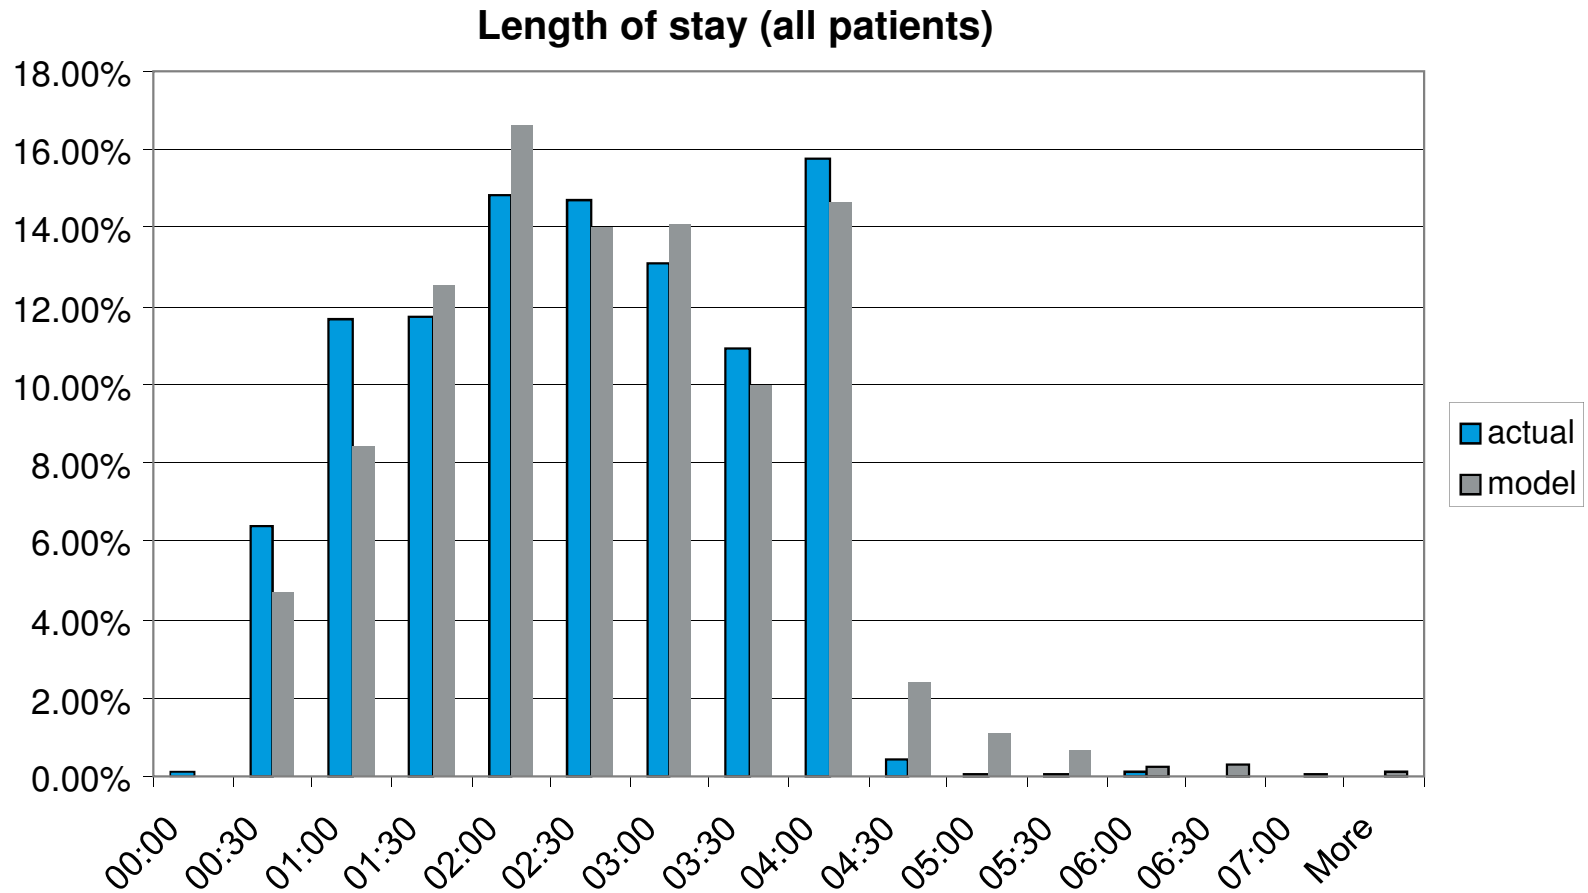

This example has resulted in several publications, including:

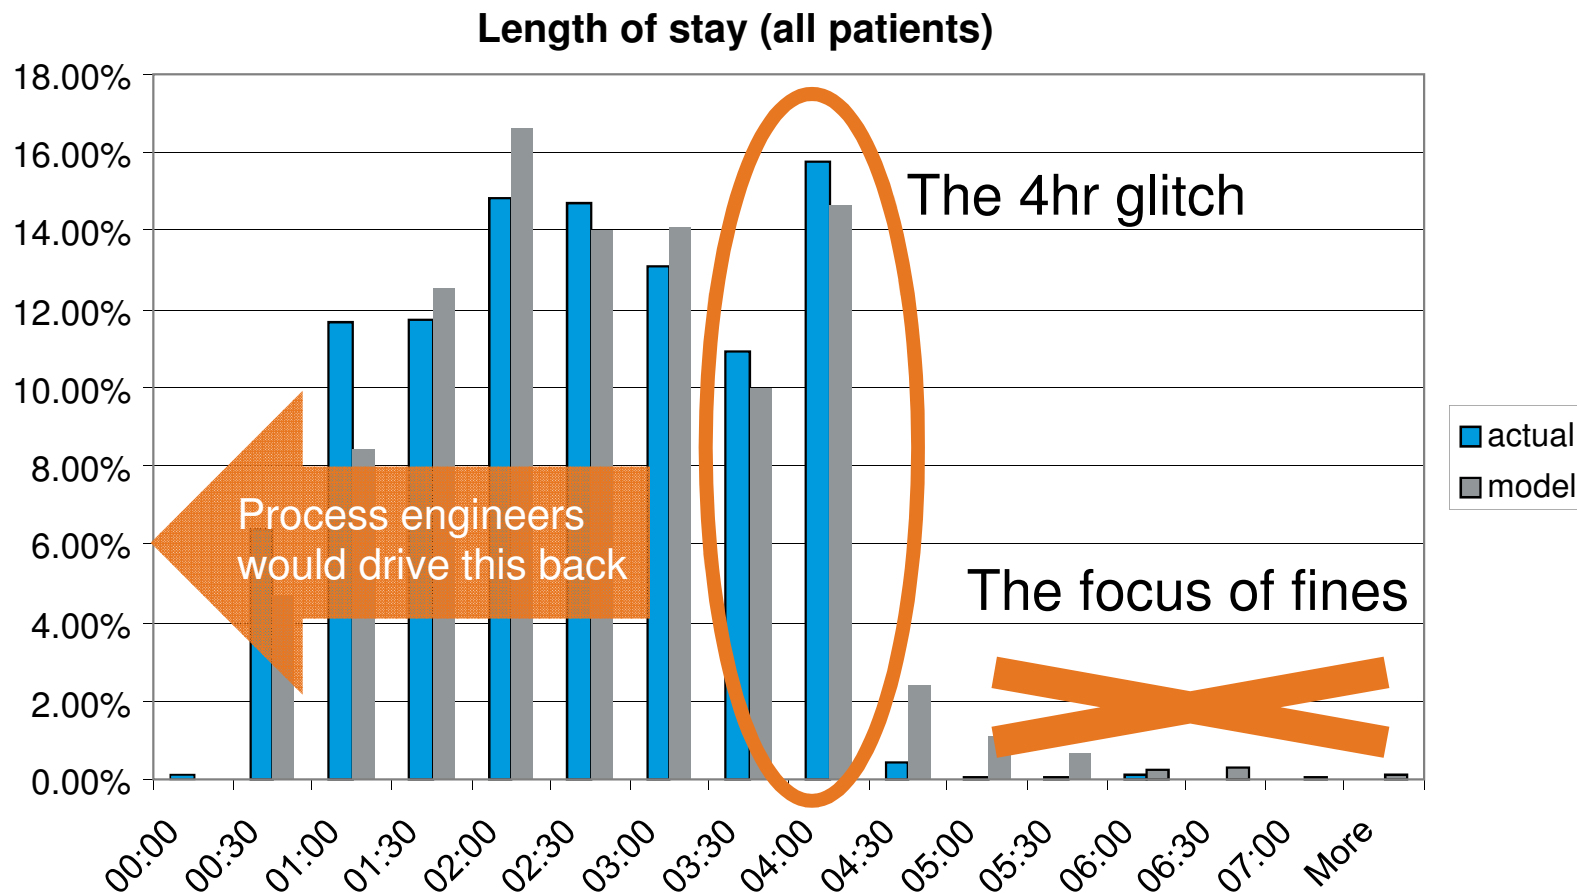

- J Coughlan, J Eatock & N Patel (2010) Simulating the use of re-prioritisation as a wait-reduction strategy in an emergency department *Emergency Medicine Journal* doi:10.1136/emj.2010.100255
- Eatock J, Clarke M, Picton C and Young T (2011) Meeting the four-hour deadline in an A&E Department *Journal of Health Organization and Management* **25**(6):606-624

The simulation model was developed and run by Dr Julie Eatock

Page 29

Public Health

- Data hub for exercise games
- Data aggregation exercises
- Top-100 research (how are the best centenarians doing)

Wealth creation

- Interactive planning of new types of job

Health industry hub

- A place where commerce, clinicians and academics meet

What can we offer?

- Around 100 of the best brains and experience in healthcare operational research and engineering design in the UK (and spreading across the world).
- A significant academic, clinical and commercial footprint in healthcare, in Slough, but with a national reach
- Clinical, industrial and academic communities that have collaborated closely for the past 5 years.
- A central creative, neutral space – the CumberLab

“There is no path; the path is made by walking”

With thanks to Dr Chris Manning
