# **Finance - Summary**

Organisation	Holds the pooled budget? (Y/N)	Spending on BCF schemes in 14/15 /£		Minimum contribution (15/16) /£		Actual contribution (15/16) /£	
Local Authority Slough		£	2,804	£	694	£	1,694
CCG Slough		£	2,808	£	8,068	£	8,068
BCF Total		£	5,612	£	8,762	£	9,762

Approximately 25% of the BCF is paid for improving outcomes. If the planned improvements are not achieved, some of this funding may need to be used to alleviate the pressure on other services. Please outline your plan for maintaining services if planned improvements are not achieved.

The BCF plan is premised upon savings from fewer non-elective admissions to hospital and shorter hospital stays. Investment of £800k is planned in 2014/15 in new or additional services that are designed to achieve at least this level of saving. These services include prevention/admission avoidance for children, falls service, care homes service, ongoing funding of the PACE 9 Post Acute Care Enablment) team and infrastructure costs to support the delivery of the BCF plan. The continuation of this policy into 2015/16 is planned to increase savings to £1.2m in that year. The large contingency showing in 15/16 will be allocated later in 14/15 when reviews have been completed with business cases signed off for each of the 3 workstream areas and financial implications for the implementation of the care bill are known. There will be close monitoring of performance against targets in 2014/15 enabling corrective action to be taken in-year should it become evident that planned improvements are not being achieved. It is anticipated that contingency funding will be available each year for the purpose.

Contingency plan:		2015/16	Ongoing
	Planned savings (if targets fully achieved)	800	800
Outcome 1 - 3% reduction in non- elective admissions in 2014/15	Maximum support needed for other services (if targets not achieved)	200	200
	Planned savings (if targets fully achieved)		400
Outcome 2 - 3% reduction in non- elective admissions in 2015/16	Maximum support needed for other services (if targets not achieved)		200

#### Outcomes and metrics

England

Outcomes & Metrics

Please provide details of how your BCF plans will enable you to achieve the metric targets, and how you will monitor and measure achievement

We plan to reduce the number of people over 65 entering residential and nursing care from 105 people per year to 100 in 15/16 by improved performance of our range of intermediate care services to be developed as part of this plan as well as the work of the integrated care teams and their focus on meeting the needs of older people with complex needs at home. We also plan to increase the number of people who are offered and take up reablement on discharge from hospital from the current 40 people per quarter to 66 and aim to have an overall 264 older people being offered the service over the full year. We expect a small reduction in performance as we increase the overall numbers. For the delayed tranfers of care we expect performance to continue at our high benchmarked levels. We expect though that by improving our work on discharge from the PACE team we will reduce the average length of stay in acute setting from an average of 2.769 bed days to 1.869 April-Dec 14 and to 1.24 Jan-June 15. We plan to reduce our avoidable admissions by 3% year on year by the projects in each of the workstreams in the BCF plan - this will be both reducing children and adults admissions. Slough has a higher numbe

For the patient experience metric, either existing or newly developed local metrics or a national metric (currently under development) can be used for October 2015 payment. Please see the technical guidance for further detail. If you are using a local metric please provide details of the expected outcomes and benefits and how these will be measured, and include the relevant details in the table below

For the patient experience metric we will implement the new national metric when this is developed. Additionally we have chosen a local indicator which ites into the CCG overall strategy to measure quality outcomes in patients as measured by the GP patient survey with long term conditions. We will also be monitoring the ASCOF measure of client satisfaction with social care and support services which comes from the social care annual survey and for 12/13 was at 49.9% for Slough (although this is a local measure as this was not part of the national ASCOF report). The survey is being conducted again now for 13/14 and we are aiming to get to our comparator group average score in 12/13 which was 62.7% and for 14/15 we would be aiming for England average in 12/13 of 64.1%.

## For each metric, please provide details of the assurance process underpinning the agreement of the performance plans

Performance plans have been developed for each of the metrics and these will be monitored via the BCF commissioning group with escalation to the Slough Wellbeing Board and governing bodies as appropriate.

If planning is being undertaken at multiple HWB level please include details of which HWBs this covers and submit a separate version of the metric template both for each HWB and for the multiple-HWB combined
