

# Slough changing views

## Transport Infrastructure

### **1.0 Definition**

The strategic links on the Slough road network - connecting our roads to your destination.

### **2.0 Strategy**

Providing accessibility, connectivity, sustainability and smarter use of the network within the built environment. Reducing journey time, congestion and improving the experience of travel in Slough through:

- A strategic transport roadmap identifying concentrations of people who need to move from a specified location;
- Providing real alternatives on the mode of travel
- Providing and catering for business now and in the future

### **3.0 Cost**

Delivery programme:

- SMaRT - £8-9m
- A355 widening - £5.8m
- A332 widening - £5m
- Burnham Station - £2m
- Langley Station - £1.5m
- Future schemes: deliver the first cycle super highway, secure funding for a Chalvey Halt, Regeneration of Stoke Road and funding for pinch points in the town.
- Wider reaching schemes WRaTH, Crossrail and Smart Motorways.

### **4.0 Quick Wins**

- Deliver a revised road map
- Commission business cases for major schemes
- Approval for Low Emissions Strategy
- Deliver "Park Mark" accreditation to our town centre car parks

- Deliver more on street Electric charging points
- Deliver 24/7 travel to Heathrow
- Roll out more Bike Hire docking stations
- Launch Slough Bike Hub the first in Berkshire
- Deliver Bluetooth journey time information
