WARD(S): All

PART I **FOR INFORMATION**

BETTER CARE FUND – 4th QUARTER REPORT

1. **Purpose of Report**

The purpose of this report is to inform the Slough Wellbeing Board (SWB) of the Quarter four outturn of the Better Care Fund (BCF) Plan for 2015/16 and provide a summary annual report to the Board.

2. **Recommendation/Proposed Action**

The Wellbeing Board is requested to note the report.

3. **The Slough Joint Wellbeing Strategy, the JSNA and the Five Year Plan**

3a. **Slough Joint Wellbeing Strategy Priorities**

The Better Care Fund programme is developed and managed between the local authority and CCG together with other delivery partners aims to improve, both directly and indirectly, the wellbeing outcomes of the people of Slough against all the priorities of the strategy but especially the Health priority.

3b. **Five Year Plan Outcomes**

The Better Care programme will contribute towards the outcome of more people taking responsibility and managing their own health, care and support needs.

4. **Other Implications**

(a) **Financial**

These are as outlined in the May report. In summary the total value of the BCF Pooled Budget in 2015-16 was £8.762m. This has increased to £9.035m in 2016-17. The expenditure plan is across 31 separate schemes between the partners of the pooled budget agreement. These are listed within the report in appendix A.

(b) Risk Management

This is as outlined within the May report. The Joint Commissioning Board continues to oversee and monitor the risk register for the BCF programme.

(c) Human Rights Act and Other Legal Implications

No Human Rights implications arise.

There are legal implications arising from how funds are used, managed and audited within a Pooled Budget arrangement under section 75 of the NHS Act 2006.

The Care Act 2014 provides the legislative basis for the Better Care Fund by providing a mechanism that allows the sharing of NHS funding with local authorities.

(d) Equalities Impact Assessment

The BCF aims to improve outcomes and wellbeing for the people of Slough through effective protection of social care and integrated activity to reduce emergency and urgent health demand. Impact assessments are undertaken as part of planning of any new scheme or project to ensure that there is a clear understanding of how various groups are affected.

(e) Workforce

There are significant workforce development implications within the programme as we move forward with integration which leads to new ways of working in partnership with others. Changes will be aligned together with other change programme activities such as that described in the New Vision of Care being led across the East of Berkshire and the Social Care transformation within Adult Social Care services in SBC.

5. **Supporting Information**

The quarter four and summary annual report marks the end of the reporting and monitoring the Slough BCF programme for 2015/16.

The BCF Plan for 2016/17 was submitted to NHS England on 3 May 2016. It was presented to the Board on 11 May has now been formally approved by NHS England following a national assurance process.

6. **Comments of Other Committees**

The report has been presented to the Slough Health and Adult Social Care Partnership Delivery Group and there no proposed comments or amendments proposed and received positive support.

7. **Conclusion**

This report accompanies the reporting outlining the quarter four and annual report on the 2015/16 Better Care Fund programme.

The plan 2016/17 will continue to be actively managed through the Joint Commissioning Board with regular progress updates to the Slough Wellbeing Board.

9. **Background Papers**

None

Appendix A.

Slough Better Care Fund Quarter Four and Annual Report 2015/16

Summary

Overall the Slough BCF programme has been a catalyst and driver towards more integrated working in Slough and through it we have developed strong governance and encouraged open discussion around pressures and priorities together with shared decision making. It has also had good clinical engagement both at a strategic and operational level from GPs and provider partners.

The BCF programme performed well in 2015/16 both in terms of its achievements against the Performance metrics and national conditions. It achieved a 1.43% reduction in non-elective (unplanned) admissions in 2015 from the same period in 2014, which is a significant achievement when profiled against the pattern of activity in most other Wellbeing Board areas in the South of England. However, the pattern of NEL activity is increasing in this year and we want to increase the scale and scope of our programme to achieve greater impact.

For 2016/17 whilst progressing on existing work within our programme we are looking for further integration and joint working across our organisational and geographical boundaries that support the ambitions of both our BCF and the New Vision of Care Programme that will take us further towards a more integrated health and social care system in Slough and East Berkshire.

Slough BCF 2015/16 – Quarter 4 report

The financial outturn of our BCF Pooled Budget was a balanced position for the end of the year. There were some variances to the financial plan arising from closure, late starts and slippage. Regular financial monitoring together with programme planning and scheduling meant we were able to forecast and plan for this so as to make effective use of all the pooled funds and support other areas of activity and pilot schemes. All changes were discussed and agreed through the Joint Commissioning Board and formalised through a contract variation to the Pooled Budget agreement.

In performance terms there was an overall impact on NEL activity and some of this evidenced to specific BCF schemes. In other areas we achieved the target of maintaining our low rate of admissions to care homes and achieved improvements in extending our offer of reablement to a greater number of older people being discharged from hospital, although our success rate has dropped slightly (to 88%) as a result.

Slough's performance on delayed transfers of care (DToC) has been variable within the year and was seen to rise in Q3 and Q4 reporting 30% and 33% above our plan. However, overall numbers are still low in Slough in comparison to the national picture. Our BCF plan for 2016/17 requires us to have a DToC plan to bring about further improvement and so work is in hand to improve in this area across the system. This includes improving our understanding through better data and analysis, and informing our commissioning activity for out of hospital services to improve patient flow and reduce length of stay where possible.

The BCF programme has had regular oversight by the Slough Wellbeing Board with quarterly reports presented to the committee on progress and activity as well as to the Health Scrutiny Panel which ensures visibility and alignment of BCF with other change and transformation programmes. This includes the established links with the reforms that are taking place in social care coming from changes through the Care Act and a shift to asset based approach, and the New Vision of Care design and modelling work happening across the East of Berkshire that will shape and inform integration at a local level.

There has been positive feedback from our partners on the Joint Commissioning Board, including acute, voluntary sector and Healthwatch, on having the opportunity to hold transparent and open debate on proposed use of BCF funding and being able to actively contribute and influence the direction of travel. The governance of Slough's BCF has been held as an exemplar by NHSE.

Performance within individual schemes

There has been significant positive impact evidence from several projects that we will continue to evaluate and build on for 2016/17. These are:

Children's Community Respiratory Service	Slough has focused in this area in recognition that significant NEL activity is from u18s, particularly around asthma and respiratory problems. Changes in the way that this are managed at practice level and supported by Community Respiratory Nurses have reduced non-elective activity by 14% from our April 2014 baseline
Care Homes	The pilot project of a bespoke programme for local Care Homes together with additional GP support which has delivered significant reductions in NEL from Care Homes (up to 50%) as well as providing improved quality of care and positive patient and family experience.
Telehealth	A small pilot project which has been targeted at patients with COPD and HF and has seen marked reduction in NEL and outpatient follow up. This is giving significant return on investment, as well as having positive feedback from patients and giving additional capacity community nursing staff as a result.
Falls Prevention	This pilot project has been commissioned with Solutions for Health and whilst only operating a few months has started to demonstrate impact against admissions due to falls, currently 9% below our April 2014 baseline.
Complex Care Management	Carrying out complex case finding and targeting interventions at those most at risk of an admission has started to show significant impact on reduction in admissions amongst this cohort. In the second month of the scheme it has shown 17% reduction in non-elective admissions and 24% reduction in A&E attendances for those identified.

BCF 2016/17 Policy and Planning

The [BCF Policy Framework](#) for 2016/17 has some key changes which included:

- Payment for Performance Framework removed and replaced with 2 new national Conditions
 1. Requirement to use to monies previously allocated to P4P for investment in NHS Out of Hospital Services (including Social Care)
 2. Jointly agreed action plan for reducing DToC
- A reduced amount of detail required for the assurance process

BCF Plans are also required to demonstrate that they are aligned with other programmes of work including new models of care (e.g. New Vision of Care) and form part of the

Sustainability and Transformation Plan, set out within the NHS Five Year Forward Plan and delivery of 7-day services.

The Slough BCF Plan was submitted NHS England on 3 May 2016 and now been approved following a national assurance process against the criteria and conditions laid out within the policy framework.

Slough BCF Plan 2016/17

The BCF Delivery Group used the BCF self-assessment tool to reflect on 2015/16 and help plan towards 2016/17. From this we:

- i) identified areas of activity that are performing well in order to build and develop these
- ii) identified projects that have been slow to get off the ground and provide additional resource and/or linking and scheduling with other planned project activity and
- iii) identified areas which aren't performing so well and take steps to review, evaluate or redesign

As outlined above we were able to identify areas of projected underspend early and ensure that this was reinvested in other areas of activity. These investments had business plans developed and supported through the shared decision making of the Joint Commissioning Board.

These additional investments in 2015/16 include:

- **Complex Case Management** – using AGC tool to carry out risk stratification and support GPs in identifying and supporting those at risk (see above)
- **Responder service** – this provided a quick response to people who are in need and use Care line services as an alternative to ambulance callouts.

We now also have several over new areas of investment into BCF schemes for 2016/17 which form part of our programme and commissioning activity to achieve person-centred integrated care. These are:

- **Integrated Cardio Prevention Programme (£151k)** - A business case has been developed and approved to commission an integrated cardiovascular prevention service for Slough aiming at reducing early deaths from cardiovascular disease
- **Out of Hospital Transformation (£200k)** - Investment identified to support the transformation of a range of services that provide short term support to people at home and in the community to support people to leave hospital in a timely way and/or avoid an unnecessary admission to hospital.
- **Care Homes – enhanced GP support (£110k)** - This investment will be used to commission an enhanced GP service to registered Care Homes in Slough to deliver improved quality of care including care planning, support and training.
- **Dementia Care Advisor (£30k)** – this is an existing scheme which is now funded through BCF and provides advice and support to those newly diagnosed with dementia as well as their carers and families.

- **Integration in local community hubs (£272k)** – this programme is at an early stage but will support the work to provide local services at local community and neighbourhood level linking closely link with the Social Care Reform and Out of Hospital programmes.

For 2016/17 there has also been an increase in investment for equipment of £260k for both health and social care (£130k for each partner) as well as some additional funding through the Disabled Facilities Grant (£368k). We will also be establishing in this year our integrated point of referral for professionals into short term services through the existing Health Hub (£150k).
