

## Britwell Biodiversity Opportunity Area Action Plan

### SBC Owned & Managed Land

In bold – action that group is working on at present

Location	Habitat Type	Action	Responsibility	Timescale	Comments
Llamas Meadow	Wetland	Open stream up into culvert	EA/SBC		Stream - no real scope for opening up as no stream existed (above ground) through the valley just Lammas Pond near Whittaker Road. Water from outlet takes spring water from former Lammas Pond area and some rain water from the local area.
<b>Lynch Hill Meadow Bunds</b>	<b>Grassland</b>	<b>Sew top of bund with wildflower seed mix and plug plant</b>	<b>SBC/Enterprise /David Kilby</b>	<b>Nov 09 onwards</b>	<b>Important to ensure no non-natives are planted that can spread to the LNRs. Look costings for comparing increase mowing from 5 – 8 cut or spraying off invasive weeds. Group to decide way forward</b>
<b>Lynch Hill Meadow Bunds</b>	<b>Grassland</b>	<b>Removal of invasive weeds from top of bund in Lynch Hill Valley BEFORE wild flower seed mix is planted</b>	<b>SBC/Enterprise /David Kilby</b>	<b>Dec/Jan</b>	<b>Look at costings for comparing increase mowing from 5 – 8 cut or spraying off invasive weeds</b>
Llamas Meadow	Grassland	Leave unmown strips round edges to create a natural buffer zone to encourage insects	SBC/Enterprise /David Kilby	Jul	The unmown areas could be designed to create a border around the trees. This would provide good structure - and may help deter anti-social behaviour under the trees. Trail areas were left July/sept

Lynch Hill Meadow	Grassland	Install an additional fireproof litter bin at Long Furlong Drive end of Lynch Hill meadow or look for solution to solve litter problem at this spot. Focus work on the Lynchill 'bowl' area	SBC/ Enterprise/David Kilby/Britwell NAG	Oct 09	Trial litter bins have been installed along long furlong drive. Group to feedback on whether bins are in the best location.
Llamas Meadow Lynch Hill Meadow Cocksherd Green	Grassland	Put in additional small wooden posts to restrict mowing round margins of grassland (as used by Evergreen on edge of green walk)	Evergreen/Enterprise/David Kilby	Feb/March 10	The unmown areas could be designed to create a border around the trees. This would provide good structure - and may help deter anti-social behaviour under the trees.
Lynch Hill Meadow	Grassland	Create dog toilet areas to allow dog walkers to share access to area – install additional dog bin	Vinay Vyas Irene King/Britwell NAG	Ongoing	<ul style="list-style-type: none"> <li>• New litter bins are multipurpose bins and can take dog waste</li> <li>• Work with community wardens to enforce dog fouling FPN wherever possible and dog warden Jackie Singer</li> </ul>
Lynch Hill Meadow Llamas Meadow Cocksherd Green	Grassland	Change mowing regime to create some areas of longer grass suitable for native wild flowers and insects – create a mosaic mowing regime to provide a natural fire break. Longer grass would also discourage illegal motorcyclists	SBC/Britwell NAG/BBOWT	April 2010	At present there is a problem with illegal motorcyclist through Lynchill Meadow, Llamas and Cocksherd wood Look at installing barriers in Cocksherd wood. Work with community wardens to review situation in other sites and look for solutions in Lynchill Valley

Lynch Hill Meadow	Grassland	Fence off small area to allow biodiversity to flourish Install some protective fencing around any areas where planting has taken place or	SBC/Britwell NAG/Evergreen	Dec/Jan	<ul style="list-style-type: none"> <li>Group has decided location of areas for planting – species to be needs to be agreed</li> </ul>
Lynch Hill Meadow	Wetland	Create pond in area at bottom of Lynch Hill valley where the area is wet and water table is higher	Evergreen/BBO WT		Pond Conservation may be able to help with this as part of the Million Ponds project -
Lynch Hill Meadow	Woodland	Tree planting – filling in gaps along bottom of valley	Evergreen	Completed March 2010	50 trees to be planted across many sites as part of Evergreen tree o'clock event in Dec
All areas	All habitats	Strengthen links to SEGRO for management of 'Millie' in light of their recently published 'Master plan' <a href="http://www.sloughte.com/Park/STE/MasterPlan">http://www.sloughte.com/Park/STE/MasterPlan</a>	SBC/Evergreen		Work with SEGRO Slough Business Community Partnership (SBCP) to encourage SEGRO to play an active part in the project.
Green Walk	Hedgerow	Infilling gaps in hedgerow	Evergreen	Completed March 10	Part of Evergreen aggregates levy funding bid
Lynch Hill Valley		Improved disabled access, improve paths	SBC/evergreen/ Britwell NAG		Through the LAF discuss with Rights of Way officer Jacqui Wheeler to look at improving paths and disabled access
Lynch Hill Valley, Llamas Meadow (please can you let me know sites with no or poor signage)		Improve directional signage and site names	Evergreen/ SBC/Britwell NAG		Through the LAF discuss with Rights of Way officer Jacqui Wheeler to look at improving paths and disabled access

## **BBOWT Managed Land - Haymill LNR**

Haymill LNR	Woodland	Open up the path on East side of Haymill NR so rubbish can be removed	BBOWT	Have some contact already- we aim to strengthen these links. Already have corporate links with some of the companies on the site.
Haymill LNR	Woodland	Strengthen links to SEGRO for management of 'Millie' in light of their recently published 'Master plan' <a href="http://www.sloughte.com/Park/STE/MasterPlan">http://www.sloughte.com/Park/STE/MasterPlan</a>	BBOWT	
Haymill LNR	Woodland	Open access to southern end of Haymill	BBOWT	This is not possible- permission has already been denied by the EA
Haymill LNR	Woodland	Look at installing a bridge at southern end of Millie to allow completion of the circular walk	BBOWT	Aiming to open out and improve the entrance to NR on Eastern side-need to link with SBC as they have a little patch of land outside of that entrance which also has issues and needs work.
Haymill LNR	Woodland	Create new access points (or reopen existing ) to make footpath on east side of Haymill Valley NR safer for visitors	BBOWT	We are hoping to put in at least 1 bridge, hopefully 2 but the locations are severely limited by EA permission being needed. Stepping stones would not be possible- impede the flow of the water. Also Health and Safety concerns.
Haymill LNR	Woodland	Create a circular walk round Haymill LNR – put in	BBOWT	Have some contact

		stepping stones to assist with river crossing		already- we aim to strengthen these links. Already have corporate links with some of the companies on the site.
Haymill LNR	Woodland	Discuss with EA whether possible to provide access round the reservoir	EA/BBO WT	

Draft
