| Precis      | <p>Objection to expansion to the greenbelt area considering the impact on noise and air pollution. Expected further damage to the environment will lead to an even worse mortality rate in the area. Significant impact on an already overloaded traffic system with added risk to the drainage in the area which is already in a high water table area.</p> <p>Limited consideration has been given to the overall impact of the increase in noise, traffic and effect on an already over populated area of greenbelt.</p> |             |             |               |             |
