Precis

Ref Planning application number
P/10076/013
I object to this development being built.
These type of Data centres are well known for excessive noise pollution very high decibels which can affect hearing and mental well-being of residents locally.They use incredible amounts of water used at a location that already suffers flooding and mains drainage problems , they are a fire risk too as has been seen in America.
Building on Green belt in an area which dosent have a great amount will affect local wildlife shouldn't be allowed either.
They are a unsightly building too and vast in size.
It will also add to the already busy Poyle Road with extra traffic
